RE: Flooding

August 1, 2017

Board of Directors:

We have property that borders the Portneuf River on Nipper Road in Chesterfield, Idaho. Our property is being flooded due to overflow of the river. This overflow is a result of too much water being put down the Portneuf River by the Water District 29.

As you can see in the enclosed photos, this flooding is preventing us access to our property and destroying our crops. The flooding has also prevented us from utilizing our irrigation systems to provide water to other parts of our property, resulting in our crops drying up and dying.

We believe Water District 29 has the responsibility to fix the problem of flooding on our property and to provide restitution for the damages to our crops and loss of revenue to our Agricultural enterprises.

Respectfully,

Carl L. Phillips
